

## Central and Eastern Europe Symposium on Microbial Ecology

Join us for the Central and Eastern Europe Symposium on Microbial Ecology (CEESME) from 12-15 September 2023 in Budapest, Hungary.

The conference aims to bring together microbial ecologists working in institutes of Central and Eastern Europe, including the Baltic to Balkan regions and Northwestern Asia, as well as researchers willing to cooperate with institutes in the region.

The meeting will cover various topics in microbial ecology, including aquatic microbial ecology, extreme environments, microbial ecology of the soil, microbial interactions and cooperation within the region.

Attendance is free, but registration is required between 3-30 April due to limited capacity.

Don't miss out on this exciting opportunity to learn, share ideas, and connect with colleagues from the region and beyond!

For registration and further information please visit our website: <https://ceesme.colres.hu/>
