

# SMNS2023

Defining a healthy microbiome

30.11. - 1.12.2023, Maribor, Slovenia

The **Slovenian Microbiome Network Symposium** is a platform that unites experts from medicine, agriculture, ecology, and environmental science to collaborate and explore microbiome research. With the theme "**Defining a healthy microbiome**", the symposium focuses on the latest analytical and theoretical advancements to understand what constitutes a healthy microbiome and to identifying commonalities in composition and function of healthy microbiomes across ecosystems.

## Keynote speaker

Christine Moisl Eichinger, Medical University Graz, Austria

## Invited speakers

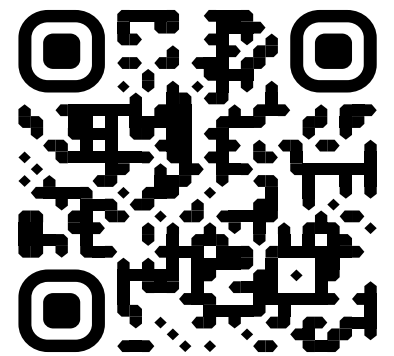

Gabriele Berg, Austria

Suncica Bosak, Croatia

Márton Papp, Hungary
